F5 technical doc links

The following are a few links with examples of documentation written by Tamar. These documents were created in collaboration with a team; with Tamar as product lead. The content written was either entirely by Tamar, or was reviewed and edited by her.

The following languages were used to generate documentation:

- Dita XML (phased out due to outdated publishing methods)
- rst
- md

Note: Tamar did not have input in css design or standardized processes for publishing.

Classic user guide documentation

- [Analyzing Statistics Data](#)
- [Sizing guidelines](#)
- [WAF Management](#)
- [How to: Migrate BIG-IP application configurations onto BIG-IP Next Central Manager](#)

API documentation

Documentation done in collaboration with developers for OpenAPI .yaml files. Content was either reviewed by, or written by Tamar using JIRA story request.

See sections:

- [Migrations](#)
- [WAF](#)

Release note samples

The following are a few samples of release notes. These were written by Tamar at the request of the product PM.

- [Visibility and security feature updates](#)
- [General feature additions and improvements](#)

Additional writing styles

- Inline UX
 - Tooltips
 - Hover overs
 - Menu titles, field headings, and subheadings
 - Error or empty results
- Bug descriptions and outcomes
